

# ShotBlocker®

Bionix® ShotBlocker helps healthcare providers minimize needle stick pain associated with injection administration at half the cost of topical freezing sprays and anesthetic creams.

## PROBLEM

Needle apprehension and pain can create anxiety associated with injections for all patients, children through adults. Anesthetic creams and freezing sprays can be costly, can damage the skin, and require additional time to reach full effectiveness.

## SOLUTION

ShotBlocker, a novel application of the Gate Theory of Pain Management, uses a number of blunt contact points to saturate the sensory signals around an injection site. Thereby distracting the patient from the pain signals associated with the needle stick.

## RESULTS

A simple, non-invasive, drug free method that quickly reduces needle pain and anxiety at half the cost of other methods.

## PRODUCT OFFERING

**#8050** - Box of 50 ShotBlockers

**#8100** - Box of 100 ShotBlockers

*"One of the most awesome devices to alleviate the pain from shots. We have patients coming in asking for ShotBlocker by name, because of the prior experience." - Prithvi Sawh, MD*

**Rx ONLY**
